FREE GUIDE FOR TEACHERS · GRAHAM STRATEGIC MEDIA

Take Your Time Back

Copy-and-paste AI prompts that help you walk out Friday at 3:00 with Monday already done.

How to use these prompts

1. Open the AI tool your school allows, like Gemini, Copilot, or ChatGPT.
2. Copy a prompt and fill in the [brackets] with your class details.
3. Read what you get, adjust it for your students, and make it yours.

Plan Your Lessons

Plan a full lesson

“Act as an experienced [grade] [subject] teacher. Create a [length]-minute lesson plan on [topic] aligned to [standard]. Include a warm-up, direct instruction, guided practice, independent practice, and an exit ticket. List the materials I’ll need.”

Get a week of warm-ups

“Write 5 bell-ringer questions for [grade] [subject], one for each day this week. They should review [topic] and take students about 5 minutes to answer.”

Reach every learner

“Here is an activity I’m using: [paste activity]. Make three versions of it: one with extra support for students who are struggling, one on grade level, and one with a challenge for students ready to go further.”

Grade and Give Feedback

Build a rubric

“Create a 4-level rubric for [assignment] for [grade] students. Use 4 criteria and student-friendly language so students know exactly what success looks like.”

Make a quiz

“Write 10 multiple-choice questions on [topic] for [grade] students, with an answer key. Mix easy, medium, and challenging questions.”

Write feedback faster

“Write 10 short, encouraging feedback comments for [assignment] that I can reuse: 4 for strong work, 3 for work that’s almost there, and 3 for students who need to revise. Each should name one specific next step.”

Get Ahead

Write sub plans in minutes

“I’ll be out on [day]. Write clear substitute plans for my [grade] [subject] class covering [topic]. Include a daily schedule, step-by-step directions a sub can follow without background knowledge, an independent activity, and what students turn in.”

Bonus tip: Start any prompt with a little about your class (grade, subject, what your students need) and every answer gets better.

Talk with Families

Write a parent email

“Write a warm, professional email to a parent about [situation]. Start with something positive about their child, keep it under 150 words, and end with one clear next step.”

Send a weekly family update

“Write a short, friendly weekly update for families of my [grade] [subject] class. This week we learned [topics]. Coming up: [dates and events]. Add one simple way families can help at home.”

Before you use it

Read it first. AI gives you a strong first draft. You’re still the teacher and the expert.

Check the facts. AI can sound sure and still be wrong.

Protect your students. Never paste student names, grades, or any private information.

Follow your district’s guidance. Use the tools and rules your school has approved.
